PROFESSIONAL SUMMARY

Highly skilled Senior Software Developer with over 15 years of experience in software architecture, microservices, and backend development. Specialized in .NET Core, C#, and Azure cloud services, with a strong background in developing robust financial systems, enterprise integrations, and electrical network management tools. Adept at working in Agile/Scrum environments to deliver high-quality, scalable solutions.

CORE COMPETENCIES & TECHNOLOGIES

- Programming Languages: C#, Java, Object Pascal (Delphi), JavaScript, TypeScript, PHP, SQL.
- Frameworks & Libraries: .NET Core, ASP.NET Core, Angular, Entity Framework, LINQ, MassTransit, HangFire, Stateless, Swing, Hibernate.
- Databases: SQL Server, PostgreSQL, Couchbase, MySQL, SQLite.
- Cloud & Architecture: Microsoft Azure (ServiceBus, Application Insights), Microservices Architecture, RESTful APIs, OOP.
- Tools & Methodologies: Git, GitLab, Azure DevOps, Visual Studio / JetBrains Rider, Enterprise Architect (UML), PowerBI, Scrum / Agile methodologies.

PROFESSIONAL EXPERIENCE

Senior Programmer | Management Control Systems Limited (MCSystems) - Kingston, Jamaica (Remote)
September 2023 - November 2026

- Led backend development using .NET Core for the eMoney Refresh financial system, a central remittance service for JN Money Services (JNMS) facilitating transfers across Jamaica, the USA, UK, and Canada.
- Implemented complex background job processing and scheduling utilizing HangFire.
- Designed and maintained highly reliable state machines using the Stateless library to manage intricate financial transaction states.
- Integrated Azure services and REST APIs to ensure secure and efficient cross-border transactions, bank account transfers, and bill payments.

Senior Programmer | AWS Malta Ltd (Sendvalu) - Malta (Remote) December 2021 - June 2023

- Contributed to the core architecture of the Sendvalu platform, a major global money transfer service with over 13,000 worldwide locations.
- Developed backend solutions using C#, .NET Core, and REST APIs aimed at expanding the platform's capabilities into wallet services, mobile top-ups, and exchange trading.
- Utilized Couchbase for high-performance data storage and PowerBI for business intelligence integration.

Senior Programmer | DYNASYSTEMS S.A.S. - Bogota, Colombia (Remote) April 2021 - July 2022

- Developed cloud-native microservices in .NET Core for the Sodexo Project, integrating financial operations with Sodexo's multinational systems using Azure ServiceBus and MassTransit.
- Implemented security logic and Identity Server integrations via the Identity Model (Sodexo Token).
- Refactored legacy code and built extensive HealthChecks mechanisms for the Oigame-Compelsiones project to ensure high availability.
- Integrated biometric validation and document signing workflows (ADO and Lleida) for the OigameFiducolmena project.
- Managed project lifecycles using Azure DevOps within an Agile/Scrum framework.

Specialist B in Computer Science (Software Developer) | Automation and Information Technology Company (ATI) - Sancti Spiritus, Cuba September 2012 - November 2021

- Played a key role in developing critical software for Cuba's national electrical energy production, using C#, .NET Remoting, SQL Server, and Enterprise Architect.
- Co-authored and developed multiple core modules including:
    - Topology Server: Allowed interaction between SCADA systems (via ModBus protocol) and client modules.
    - Switching Module: Enabled direct manipulation and control of electrical network elements.
    - Monitoring & Monolineal Modules: Used by dispatchers across the Cuban Electrical Union for network supervision and mapping.
- Provided end-user training, technical documentation, and managed software lifecycle from requirement gathering to production deployment and bug fixing.

Software Developer | DESOFT S.A. - Sancti Spiritus, Cuba September 2009 - October 2011

- Developed enterprise applications using Java, Hibernate, and PostgreSQL.
- Built ESTIPEN v1.0, a multi-user financial system managing stipend payments for university students.
- Developed HIDROGES 1.0, a national-level water balance management tool.

Software Developer (Internship) | Provincial Electric Company - Sancti Spiritus, Cuba June 2007 - February 2008

- Developed software in Object Pascal/Delphi and SQL Server to support the province's electro-energy production processes.

EDUCATION

Master in Applied Informatics | University "Maximo Gomez Baez" of Ciego de Avila, Cuba July 2018

- Thesis: "Control of the electrical network with Switching"

Bachelor's Degree in Computer Science | Central University "Martha Abreu" of Las Villas, Cuba July 2009

- Thesis: "Software development management tool for SCRUM-UP process" (ProjectSCRUM).

LANGUAGE PROFICIENCY

- Spanish: Native (Advanced Oral/Written).
- English: Intermediate (Professional working proficiency).
- French: Intermediate-Advanced.
    - Certifications: Diplome d'Etudes en Langue Francaise (DELF) B1 (2013) & B2 (2014); Test de connaissance du francais pour le Quebec (TCFQ) B2/B1 (2015, 2017).

SELECTED ACHIEVEMENTS, PUBLICATIONS & COURSES

- Publication: "Topology Server and Switching client application for the control of the electrical network", Margenes Magazine (Vol. 6 No. 2, 2018).
- Awards: Multiple "Relevant" and "Outstanding" awards at the National Science and Technology Forums in Cuba (2010-2018) for contributions to electrical grid control software (Switching, SIGERE).
- Mathematics Olympiads: Grand Prize and multiple 1st place awards in Cuban National Mathematics Competitions (2000-2002).
- Academic Training: Completed advanced postgraduate courses with maximum scores (5/5) in Databases, Artificial Intelligence, Digital Image Processing, Software Quality, and Operating Systems (2016-2018).
- Teaching: Served as a professor for the "National Training Course on SIGERE Modules" for specialists of the Electric Union (2017).
