Education

Bachelors Degree in Computer Science July 2009
Central University Martha Abreu of Las Villas, Santa Clara, Cuba
Thesis: Software Development Management Tool for the SCRUM-PU Process
Advisors: Dr. Raúl Fernández Álvarez, Lic. Yusmaikel Cabrera Marín

Masters Degree in Applied Informatics July 2018
University Máximo Gómez Báez, Ciego de Ávila, Cuba
Thesis: Control of the Electrical Grid with Switching
Advisor: Dr. Raúl Fernández Álvarez

Professional Experience

Senior Programmer, Management Control Systems Limited September 2023 Present
Kingston, Jamaica

- Backend development using .NET Core for eMoney Refresh, a remittance system by JN Money Services for transfers to Jamaica, Cayman Islands, USA, and Canada.
- Implemented REST APIs using .NET Core, Azure DevOps and Microsoft SQL Server.

Senior Programmer, AWS Malta Ltd December 2021 June 2023
Malta

- Developed backend for Sendvalu, a global remittance platform expanding to wallet and mobile top-up services.
- Utilized .NET Core, Azure Services, Couchbase, and PowerBI in a microservices architecture.

Senior Programmer, Dynasystems S.A.S. April 2021 July 2022
Bogotá, Colombia

- Built microservices in .NET Core for financial projects like Sodexo and Oigame-Colpensiones, using Azure and Masstransit.
- Implemented security with Identity Server and optimized code through refactoring.

Computer Science Specialist B, ATI September 2012 November 2021
Sancti Spíritus, Cuba

- Developed modules for electrical grid management (Switching, Monolineales, Supervisión) using C#, .NET Remoting, SQL Server, and GitLab.
- Provided user training and technical documentation.

Trainee Developer, Desoft S.A. September 2009 October 2011
Sancti Spíritus, Cuba

- Developed systems in Java with Hibernate, PostgreSQL, and NetBeans for stipend management (ESTIPEN) and water balance (HIDROGES).
- Created installers, documentation, and trained end-users.

Trainee Developer, Provincial Electric Company June 2007 February 2008
Sancti Spíritus, Cuba

- Programmer in Object Pascal and SQL Server for electrical systems, with UML modeling in Enterprise Architect.
- Updated documentation and provided technical support.

Selected Projects

- **eMoney Refresh (JN Money Services)**: International remittance system using .NET Core, Azure, and SQL Server.
- **Sendvalu**: Global transfer platform with .NET Core, Couchbase, and PowerBI.
- **Sodexo Project**: Financial microservices with .NET Core and Masstransit for Sodexo integration.
- **Switching**: Electrical grid control module in C# and SQL Server, integrated with SCADA via ModBus.

Technical Skills

- Languages: C#, Java, Object Pascal, SQL, JavaScript, PHP
- Technologies: .NET Core, Azure, Angular, SQL Server, Couchbase, PostgreSQL, Hibernate, Masstransit, PowerBI
- Tools: Visual Studio, Azure DevOps, GitLab, Enterprise Architect, NetBeans
- Methodologies: Scrum, UML, Object-Oriented Programming

Languages

- Spanish: Native
- English: Intermediate (oral and written comprehension and expression)
- French: Intermediate-Advanced (DELF B1, B2; TCF Québec B1-B2)

Certifications

- DELF B1, Alliance Française, Santiago de Cuba, July 2013
- DELF B2, Alliance Française, Santiago de Cuba, August 2014
- TCF Québec (B1-B2), Alliance Française, Havana/Santiago de Cuba, 2015-2017

Postgraduate Courses

- Databases, University Máximo Gómez Báez, 2018 (Excellent)
- Artificial Intelligence, University Máximo Gómez Báez, 2017 (Excellent)
- Software Engineering, University Máximo Gómez Báez, 2016 (Excellent)

Publications and Awards

- Publication: Topology Server and Switching Client for Electrical Grid Control, Márgenes Journal, 2018
- Relevant Award, Science and Technology Forum, ATI, 2018: Reading SCADA Variables via ModBus Protocol
- Outstanding Award, National Forum, Electric Union, 2015: Switching Grid Control Module v5.0.18.15
